Notes from the Universe

A little known secret concerning life in the jungles of time and space, is that however far you reach, you will go farther. However great your dream, it will be grander. And however much you love, you will be loved much more.

We call it the law of increasing returns.

Love you much more,
The Universe

DIDGERIDOO - SOUND HEALING - JOURNEY is an opportunity to soak in the deep cellular cleansing and spiritually transportive vibrations of the didgeridoo, an ancient and magical instrument as old as rhythm itself. Participants lie down comfortably while the didgeridoo is played over their bodies, energizing cellular processes and unlocking the deeper mysteries of the soul. Facilitation includes a brief description of the mythology of the didgeridoo, simple meditative direction to maximize the benefits of the process, and the opportunity to share one's experience with the group afterwards (time permitting). Bring a blanket & pillow.

Bio: Om'Mok is an accomplished sound healer trained in the application of energetic sound therapy with the didgeridoo. His service is to empower the body's ability to self-heal and to safely facilitate extended journeys into the deeper layers of our consciousness in order to gain a fuller understanding of oneself. He is not a healer but instead is a facilitator of healing. He is not a shaman but simply one willing to share his own experiences of the great Mystery. In essence, he is one that provides tools to support you in your Path.
